About the plant list

- We use a code format for plant size/age : the first number followed by 'y' is the age of the plant, in years (or sometimes we will find the height of the plant in cm), and the second number preceded by '#' is the size of the pot (#1L = 1 liter pot, #2G = 2 gallons pot, #13cm = 13 cm diameter pot, etc.). Plant size in mm refers to the trunk diameter. NR means that the plant is delivered without soil, in a bag, with 'Naked Roots'. These plants need to be planted quickly, in the days following delivery. Examples :
 - 3yNR means Naked Roots 3 years old plant (in a bag)
 - 100-150cmNR means Naked Roots 100cm to 150cm high plant (in a bag)
 - 25 x 1yNR means 25 Naked Roots plants of 1 year (bundle)
 - For small plants, we provide the pot size (#10cm, #11cm, #1L, #1G)
- The 'Z' column indicates the hardiness zone. The lower the number, the more the hardiness (hardiness to cold). Zone 5 plants are the most cold-sensitive. Check on our website to [find your location's hardiness zone](#)
- Click on a plant's name to see images of the plant (thanks to google images)

For those in the area delimited by Cap-Chat and Grande-Vallée (included), you can enjoy our [landscaping services](#). We can also make arrangements for landscaping services elsewhere in Gaspé peninsula.

Note that we can find plants that are not on this list for you, if you know what you need. Don't hesitate to contact us about any questions, special request, etc., the earlier the better. It's a pleasure to serve, doing our best for our customers.
